3M Innovation

Introducing the 3M™ Wireless Headset Intercom Model C1060

The Next Generation in Wireless Communication

No Wires, No Worry

The new 3M™ Wireless Headset Intercom Model C1060 is the latest addition in our continuing commitment to provide innovative communications solutions for you. Its patented, innovative, space-age design will keep your employees comfortable and productive while giving your customers clear communication with your restaurant.

And we've made it easy for you to upgrade your system—it's completely compatible with our existing 3M™ Wireless Intercom Systems, models C960, C860 and C760.

Comfort

- Self-contained headset intercom is the smallest available on the market today. Weighing approximately four ounces, it's easy and comfortable for your employees to wear.
- Rotating wedge ear cushion is infinitely adjustable to any ear shape.
- Headset is more evenly balanced for comfort.

Durability

- Sealed membrane switches help keep dirt and grease out, so you'll have fewer service calls.
- Microphone grille is cleanable—allowing you to maintain optimized sound quality.
- Flexible microphone boom will bend, but is designed to resist breaking.
- Hardened stainless steel padded headband won't break or rust.

Performance

- Clear communication provides accurate order taking which helps speed up your drive-thru activity.
- Infrared programming link means no wires to break or lose, no bent connector pins, no worries.
- Lightweight lithium-ion battery provides up to ten hours of power.
- Bi-color LED indicator lets you know it's on and what mode it's in.
- No FCC license required.
- Noise canceling microphone won't let most restaurant sounds filter through to your customers.

Productivity

- Hands-free operation lets your employees do multiple tasks.
- Self-contained design allows quick change-out between employees—there are no belts to adjust or wires to hook up.
- Dual-lane support helps you adjust staffing needs according to store volume.
- State-of-the-art rechargeable battery technology provides consistent usage time—battery memory effect won't decrease usable operating time.
